Education

University of Michigan, College of Engineering

Ann Arbor, MI

Bachelor of Science in Engineering (B.S.E.) in Computer Science

- GPA: 3.71/4.0 | Honors: Dean's List, Academic Honors
- Course Highlights: Data Structures and Algorithms, Discrete Mathematics, Computer Organization, Linear Algebra

Experience

NASA, Collaborative Lab for Advancing Work in Space (CLAWS) | Unity, C#, Mixed Reality Toolkit (MRTK)

Ann Arbor, MI

Augmented Reality Developer

Oct. 2025 - Present

- Selected as one of 10 university teams chosen nationwide to compete in the NASA SUITS Challenge.
- Engineer core features for an augmented reality (AR) astronaut interface using Unity and MRTK, encompassing custom pathfinding algorithms, dynamic UI mapping, and the full-stack integration of an AI Agent (AIA) for lunar surface navigation.
- Collaborate with AI, UX, and Research teams to design and build intuitive, human-first AR systems for mission-critical tasks, leveraging weekly cross-functional strategy sessions to align on technical feasibility and critical design decisions.

Funktion, All-Male Open Style Dance Team

Ann Arbor, MI

Co-President & Web Lead

Jan. 2025 - Present

- Directed the organization's digital infrastructure and served as the sole developer for the official team website.
- Performed advanced choreography in the University of Michigan's largest student-run show for a live audience of over 1,200.
- Dedicated 150+ hours to mastering new and diverse open-style choreography for major university showcases.

Projects

Synced In (Personal Project) | C#, Unity, 2D Design

Bloomfield Hills, MI

Solo Developer

Sept. 2022 - Dec. 2022

- Executed a launch on Unity Play, independently managing deployment and attracting over 370 unique plays.
- Architected core game logic, player mechanics, and interactive systems entirely from scratch, utilizing C# scripting and the Unity game engine.
- Prototyped 20+ complex puzzle designs, iteratively refining mechanics and difficulty-curve to engineer and publish 6 highly optimized, production-ready levels.

Funktion Dance Team Website | Next.js, TypeScript, Tailwind CSS, GSAP, Framer Motion

Ann Arbor, MI

Solo Developer

Feb. 2026 - Mar. 2026

- Developed an official organization's website from scratch using Next.js App Router for optimized server-client architecture.
- Directed the end-to-end development and independent deployment of the application, accelerating the Software Development Lifecycle (SDLC) by leveraging multiple AI tools to brainstorm, test, and execute advanced frontend features.
- Engineered a type-safe TypeScript data model and roster system to efficiently manage, filter, and visualize 25 years of membership history, encompassing 180+ members across 50+ classes.

SoleWarmers Design Project | SolidWorks, Trello, Gantt Chart

Ann Arbor, MI

Co-lead

Sept. 2024 - Dec. 2024

- Co-managed a 3-month product development lifecycle for a five-person team, utilizing Trello and Gantt charts to track milestones and drive the "SoleWarmers" concept to a manufactured prototype through 3 iterations.
- Drove key contributions across all project phases, including concept ideation through SolidWorks, technical design, strategic planning, and hands-on manufacturing.
- Fostered team alignment and project momentum by authoring formal technical documentation, ensuring all engineering phases met strict milestones before presenting the final prototype to an audience of 40+ attendees.

Additional

- **Programming Languages:** C++, C#, C, Python, HTML, CSS, R, MATLAB
- **Tools and Technology:** VSCode, Unity, Mixed Reality Toolkit (MRTK), GitHub, Git, LaTeX, YOLO, OpenCV
